## What Attendees Said About FLI:

**Lucetta Holderness:** “FLI provided a truly unique platform for IH professionals progressing towards management and leadership positions to share, learn and develop. The course provided invaluable learnings on becoming a business leader in an IH context, and focused on the skills needed to create an IH vision in an organisation and energise and engage the organisation to this vision. The course is delivered in a refreshingly engaging and participative style that allows shared learning and individuals to focus on development actions and goals. FLI was an invaluable 2 day investment; the friendships and networks that will continue to develop and grow from it are priceless for any aspirational IH leader.”

**Ying Zhen:** “I had amazing experience at FLI. Twenty-five attendees from many different countries and with different life experiences made for an open-minded, brilliant and passionate group - professional but not boring! I was surprised by how much others are willing to share and help. FLI encouraged me to be more active. I’ve joined the Florida local session and volunteered for a project that will create an IH promotional video.”

**Cathy Hovde:** “We can now help each other with work and career issues. I plan to pay it forward, ensuring that I seek out opportunities to share what I’ve learned with others.”

**Heidi Partlowe:** “This event was a phenomenal opportunity generously supported by AIHA, the FLI donors and former FLI participants. I would describe FLI as a once in a lifetime opportunity with invaluable benefits. I think the most important benefit was development of personal relationships with the current and past participants as well as the AIHA staff and board members. The team developed a strong sense of community that I feel will last my whole career. I loved the interactive activities that allowed us to work together and get to know other participants on a much deeper level than is traditionally possible at a conference. I was inspired and feel recommitted to volunteering for the organization. I am currently on the local section board and the lessons learned will directly apply in my volunteering role as well as in my professional

role. I have already put the lessons to use and have embraced my DiSC role as the ‘promoter,’ using energy from the seminar to inspire and motivate change in others.

Thanks to all who make this event possible.”
